

NGUYEN TRUNG TUNG

BACHELOR OF DATA SCIENCE IN ECONOMICS AND BUSINESS

CONTACT

+ 84 384323128

tungdk2006@gmail.com

Duong Noi ward, Hanoi city, Viet Nam

SKILLS

- Programming & Databases:
Python (Advanced), SQL (Intermediate), R (Intermediate), C++ (Intermediate).
- Data & AI Competencies:
Machine Learning / Deep Learning Architectures, Data Analytics & Visualization, ETL Pipelines, AI-related Research Fundamentals.
- Core Competency: Complex Problem-solving, Critical Thinking, High Adaptability, Cross-cultural Communication & Teamwork.

LANGUAGES

- Vietnamese
- English ~ IELTS 7.5 overall
- Chinese ~ HSK3

PROFILE

Ambitious Data Science student with a robust foundation in machine learning, data engineering, and statistical analysis. Passionate about applying AI-driven solutions and automation to scientific research and real-world complexities. A lifelong learner with high adaptability, strong critical thinking, and cross-cultural communication skills. Eager to leverage a multidisciplinary approach to tackle complex challenges in collaborative, international environments.

ACADEMIC PROJECTS AND EXPERIENCE

FirmDataHub - Enterprise Financial Database Project 12/2025 - 02/2026

- Architected a structured relational database using Python and SQL to integrate disparate financial records across multiple reporting formats.
- Engineered automated ETL pipelines to standardize complex accounting variables, significantly improving dataset consistency and analytical readiness.
- Synthesized technical findings to evaluate how data infrastructure influences perceived financial risk and access to capital for underserved SMEs.

Multi-Modal E-commerce Recommendation System 04/2025 - 06/2025

- Collaborated on a high-performance recommendation engine, integrating Collaborative Filtering and Multi-modal Deep Learning architectures.
- Orchestrated data synthesis and feature engineering for expansive synthetic datasets to simulate realistic commercial environments.
- Designed a user-centric deployment interface using Streamlit, facilitating real-time visualization of algorithmic outputs for diverse stakeholders.

Academic Mentorship (English Tutor) 10/2024 - PRESENT

- Design and implement personalized learning programs for pre-IELTS students, accelerating language proficiency across all core skills.
- Support adaptive communication strategies in an immersive English environment, enhancing students' cross-cultural communication skills.
- Demonstrate leadership by managing students' learning progress, consistently achieving measurable improvements in academic outcomes.

EDUCATION

National Economics University(NEU) | Hanoi, Vietnam 2024 - 2028

Bachelor of Data Science in Economics and Business (DSEB)

- GPA: 3.5/4.0
- Core Coursework: Machine Learning, Deep Learning, Data Structures and Algorithms, Database Management Systems, Econometrics and Statistical Modeling, Blockchain and Distributed Ledger Technologies.
